

the new accurate
analysis and
classification system
of knee joint
osteoarthritis

ISO 13485 certified 

James, your smart assistant for standardized and reproduceable examinations

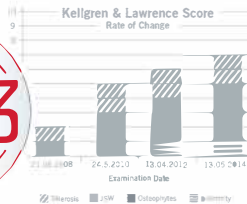

James is accurate, mobile and easily adjustable. James is ideal for your diagnosis, essential for follow-ups and studies. Optimize your workflow comfortably, because fewer retakes will save you time and reduce the radiation dose for your patients. **James is designed for your needs.**

Works best in combination with IB Lab JSX software

Combine James with our IB Lab JSX software to get fully automatic information of the progression of cartilage destruction. No more second guessing! IB Lab JSX software will give you the information you need including JSX, AUC, Kellgren & Lawrence and Rate of Change.
